Chapter 1. Introduction

Chapter 2. Add

What is Addition

Here you will learn the definition of addition and how to use it in the app.

Addition allows you to find the combination of first number with the second number in an equation.

You can use the addition (+) sign in the app to add numbers.

How to Add Numbers

Here you will find instructions for using your calculator app. to add numbers.

To successfully add numbers, you must understand addition.

1. Press the first number's button.
2. Press the (+) button.
3. Enter the second number's button.
4. Press the (=) button.

The result from the addition is displayed.

Example:

You want to add 1 and 2. The equation will look like $1+2=3$. Press the 1 button. Press the plus (+) button. Press the 2 button. Press the equals (=) button.

The result, the number 3, will appear on the display.

Chapter 3. Subtract

What is Subtraction?

Here you will learn the definition of subtraction and how to use it in the app.

Subtraction allows you to find the difference between the first number and second number in an equation.

You can use the minus (-) sign in the app to subtract numbers.

How to Subtract Numbers

Here you will find instructions for using your calculator app. to subtract numbers.

To successfully subtract numbers, you must understand subtraction.

1. Press the first number's button.
2. Press the (-) button.
3. Enter the second number's button.
4. Press the (=) button.

The result from the subtraction is displayed.

Example:

You want to subtract 2 from 3. The equation will look like $3-2=1$. Press the 3 button. Press the minus (-) button. Press the 2 button. Press the equals (=) button.

The result, the number 1, will appear on the display.

Chapter 4. Multiply

What is Multiplication?

Here you will learn the definition of multiplication and how to use it in the app.

Multiplication allows you to find the multiple of the first number with the second number in an equation.

You can use the multiplication (x) sign in the app to multiply numbers.

How to Multiply Numbers

Here you will find instructions for using your calculator app. to multiply numbers.

To successfully multiply numbers, you must understand multiplication.

1. Press the first number's button.
2. Press the (x) button.
3. Enter the second number's button.
4. Press the (=) button.

The result from the multiplication is displayed.

Example:

You want to multiply 1 and 2. The equation will look like $1 \times 2 = 3$. Press the 1 button. Press the multiply (x) button. Press the 2 button. Press the equals (=) button.

The result, the number 2, will appear on the display.

Chapter 5. Divide

What is Division

Here you will learn the definition of division and how to use it in the app.

Division allows you to find the separation of the first number from the second number in an equation.

You can use the division (\div) sign in the app to divide numbers.

How to Divide Numbers

Here you will find instructions for using your calculator app. to divide numbers.

To successfully divide numbers, you must understand division.

1. Press the first number's button.
2. Press the (\div) button.
3. Enter the second number's button.
4. Press the (=) button.

The result from the division is displayed.

Example:

You want to divide 4 by 2. The equation will look like $4 \div 2 = 2$. Press the 4 button. Press the division symbol (\div) button. Press the 2 button. Press the equals sign (=) button.

The result, the number 2, will appear on the display.
